

Aurion

FACT SHEET

EMPLOYEE LEAVE

Aurion Leave saves time and reduces cost by automating leave administration for all employees irrespective of their entitlement, work pattern and changes to the hours they work. Aurion supports any number of leave types and calculates leave accrual and leave liability.

Integration with Payroll means a person's pay is updated for prepayment and leave at less than full pay. Accurate costing is assured as Aurion allocates provision for leave accrued during the pay to the employee's cost centres. Staff availability charts in Self Service make leave planning and reporting easy.

BENEFITS

Simplify administration

Aurion validates leave application at data entry in real time and fully automates flow on processes. This reduces errors and time spent on corrections and responding to enquiries.

Aurion automates leave administration for both full and part-time employees using their work pattern to calculate the duration of the absence.

Aurion prepays leave on request, reduces the pay for leave at less than full pay and recovers any overpayment where this is recorded retrospectively.

Accurately calculate cost entitlements

Aurion Leave calculates the amount and value of leave accrued each pay using hours that count as service. Aurion adjusts the accrual of other leave and future increments for leave not to count as service.

Integration with Payroll Costing ensures accurate cost information. The value of leave accrued during the pay is attributed using the person's cost profile and leave takings are costed to the relevant provision accounts.
